NOTE: *Audio issues on Roku Streaming Sticks (3820, 3821) have been reported. Newer Models of the listed devices above and Smart TVs equipped with Amazon, Roku and/or AppleTV software may work in most cases but are not guaranteed. Device models that reduce memory and/or processing power, or support just 30 fps, may not work. Examples of non-supported devices are Fire TV Stick Lite and other devices on the lower end that do not have the power to run the Midstate X-Stream app.
